

INVINCIBLE

THE WATER IS A SERIOUS PLACE.

A place where the best of days can become the worst of days. Which is why the truly serious know they need equipment that is just as serious as they are. Something durable. Something beautiful. Something fast. Yacht-quality finish with hardcore strength. Because when you're serious, you need a boat that is up for everything, and ready for anything.

Invincible. When you're serious.

SOARING ABOVE THE WAVES, KING OF ALL YOU SEE.

**You are *Fregata magnificens*.
The Magnificent Frigate.
And the sea is your domain.**

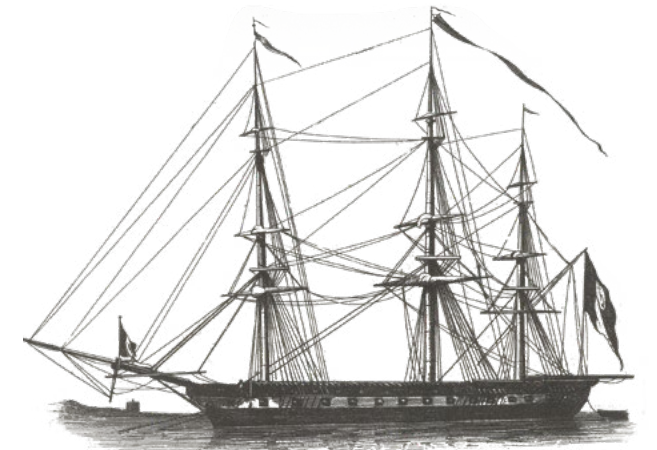

You can be found far offshore, soaring for days and nights non-stop, using your seven-foot wingspan to cruise from the wavetops to a half-mile up in the sky, tracking schools of tuna and flying fish for hundreds of miles.

For thousands of years, fishermen knew that finding frigate birds were a sign of good fortune. Christopher Columbus

recorded them around the Cape Verde Islands in 1492. Islanders in the South Pacific used them as message carriers on long voyages due to their incredible abilities to navigate home across vast distances. French sailors first called the birds “le frégate” in the 18th century, after the small, fast frigate warships of the era. The Royal Navy referred to them as “Man-o-war” birds. There are five species of frigate birds found around the world. The largest of these is the one seen throughout the tropical waters of Florida and throughout the Caribbean — the Magnificent Frigate.

So when we set out on our mission to build the very best offshore fishing machine ever created, it only seemed natural for us mark everything we make with the Magnificent Frigate, as it embodies all of the qualities an Invincible boat strives to achieve: unmatched intensity and speed while on the hunt, paired with grace and horizon-stretching range.

A GIANT STEP FORWARD. (TWO, ACTUALLY.)

Founder Alex Lipworth demanded the most out of his gear. As a hardcore competitive fisherman, he spent many years pushing himself and a series of boats on long, fast and often rough runs across the fertile fishing grounds of the Gulf Stream. And in the process, he could never quite find a boat that met his exacting standards for performance, durability, efficiency and functionality.

IF YOU WANT A JOB DONE RIGHT, YOU HAVE TO DO IT YOURSELF.

He sought the ultimate offshore fishing machine, and when he couldn't quite find it, he rolled up his sleeves and decided to build it himself. In 2006, he teamed up with world-renowned marine architect Michael Peters to craft a revolutionary innovation that would change the entire industry, the Stepped Vee Ventilated Tunnel (SVVT), giving his new hull

design unprecedented speed and ride quality, combined with best-in-class fuel efficiency and stability.

DESIGNED FOR THE SERIOUS.

This hull was then brought to life with a clean-sheet-of paper design, making the ergonomic and functional demands of the hardcore offshore angler the first priority in every decision, from hatch and compartment placement to the rigging and plumbing. All of this was then approached from an engineering perspective to, combine bank-vault quality strength with yacht-quality finishes throughout, designed for a lifetime of performance and durability that will stand up to the toughest use.

BUILT TO BE LEGENDARY.

It's the ride the industry is talking about. That's what we set out to achieve in 2006 and it has reshaped the center-console category. The fastest and flattest-riding hulls in the business must be experienced to truly feel the Invincible difference. Our expert builders use the most current techniques available and the finest materials to build boats that are athletic and stronger than our competitors. Within the parameters of semi-custom, owner-designed boats, we are specialists at ensuring your Invincible is built to our exacting standards, but with your distinct wishes in mind.

SERIOUS BOATS FOR SERIOUS ADVENTURES.

Since the 2006 introduction of the original Invincible 36', our fleet has grown to nine models ranging from our compact 33' to the upcoming horizon-crossing 46' Cat, ensuring that no matter who you are and how you fish, there is an Invincible that's designed exactly for you. Because when you're serious, you will accept nothing less than the very best.

MONO-HULLS

33' OPEN FISHERMAN

The Invincible experience, in its most compact form.

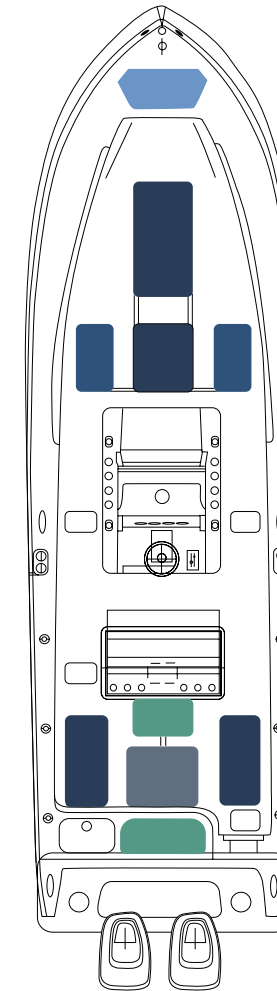

Designed to incorporate the enhanced performance characteristics of the patented Stepped Vee Ventilated Tunnel along with the ease of use and economy of twin engines. Rides and fishes like a big boat, handles like a small one.

- Highlighted Features:**
- Single Level Deck
 - 360-Degree Walk Around Fishability
 - 320 Gallons of Fuel Allows for 425-plus Nautical Mile Range

Standard Features

- Transom Door
- AGM Sealed Batteries
- Built-In Anchor Locker
- Deluxe Console with Fully-Lined Interior and Room for Full-Sized Head
- Exceptionally Generous Under-Deck Storage
- Finished Bilge
- Under Gunnel Lighting
- High-Speed Pickup for Livewell Seachest
- Sink with Tackle Drawers
- Saltwater Washdown
- Three Automatic 2,000 GPH Bilge Pumps
- Waterproof Switches and Circuit Breaker Protected System
- 100% Vinylester Resin Hull
- 316 Stainless-Steel Hardware

- Insulated Fish Box
- Forward Side Storage
- Anchor Locker
- Livewell
- Bilge Access

42' CENTER CABIN

The softer side of serious.

We took the biggest, baddest machine we make, and added some of the comforts of home. It features the creature comforts that the discerning angler and their family might like, like a roomy air-conditioned V-berth, head, sink and kitchenette, all hidden in the center of one of the most versatile fishing machines on earth.

Highlighted Features:

DOUBLING DOWN ON PERFORMANCE.

Where some would rest on their laurels, Invincible is always in search of the next way we can do something better. Catamarans are not a new idea—the Polynesians have been building them for thousands of years. Despite uncomfortable handling dynamics and unrefined hydrodynamics, power catamarans have acquired a small but dedicated following due to the inherent advantages a catamaran can provide: Superior room and deck space, fuel efficiency, speed and stability.

REINVENTING A 5,000 YEAR-OLD DESIGN.

Seeing an opportunity to maximize the advantages, while innovating solutions to the drawbacks of a performance catamaran, Invincible teamed up with Gino Morrelli and Pete Melvin of Morrelli & Melvin, the designers behind some of the most iconic sailing catamarans of the past 20 years: Playstation/Cheyenne, America's Cup Winners, BMW Oracle USA and Aotearoa Team New Zealand. Their championship pedigree and investment in

computational fluid dynamics make them the most knowledgeable and technologically advanced firm in boating.

A CHEAT CODE FOR THE LAWS OF PHYSICS.

For Invincible to build a catamaran, it had to handle well at speed, lean inward in a turn and ride in following and quartering seas without negative trim. The result: the unprecedented Invincible 40' Catamaran. Utilizing Morrelli & Melvin's patent-pending hybrid semi-asymmetric multihull design, the complete line of Invincible Catamarans provides eye-popping performance combined with the dry, soft ride you've come to expect from us, all packaged in a cat that has eliminated the compromises that came with catamarans in the past. Quick, responsive handling, a soft, stable ride and best-in-class speed. When you're serious about industry-leading performance, you partner with the very best.

CATAMARANS

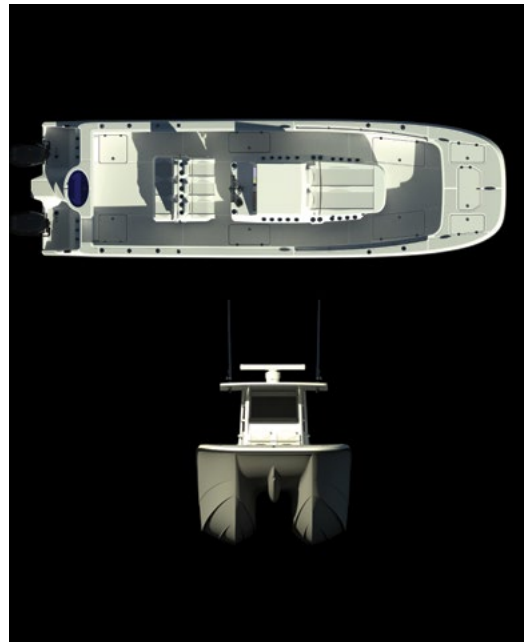

33' CATAMARAN

Performance, in a more concentrated form.

Five years ago we teamed up with Morrelli & Melvin for the first time to show the world what a catamaran can truly achieve. Now it's time to do it again with our smallest platform yet. We took the unprecedented performance, versatility and amenities of our model lineup and packaged it in a powerful, agile and nimble new form. Introducing the new Invincible 33' Catamaran. A whole new size of serious.

35' CATAMARAN

Big Cat performance in a smaller package.

Our most compact catamaran is designed to get maximum performance out of either a twin or quad engine configuration. It's a versatile fishing machine, with effortless maneuverability, a speedy, comfortable ride and unparalleled fishability for a boat of its size, due to the tremendous cockpit and deck space our patent-pending design creates.

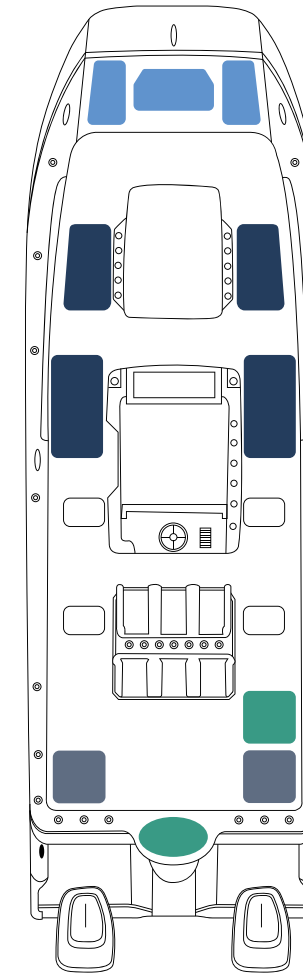

Highlighted Features:

- 360-Degree Walk Around Fishability

40' CATAMARAN

The biggest kind of serious.

The Invincible 40' Catamaran – Never content to rest on our laurels, we recently reinvented the entire catamaran industry when we launched our original 40' in 2017. Our 40' is the first to use Morelli & Melvin's innovative hybrid semi-asymmetrical design, giving it unprecedented performance and handling for a catamaran, with the speed, room and range to carry you and your crew virtually anywhere, under any conditions.

- Highlighted Features:**
- 360-Degree Walk Around Fishability
 - Side Dive Door (Optional)
 - Flat Transom
 - 750-plus Nautical Mile Range

Standard Features

- Above and Below Deck Livewells
- AGM Sealed Batteries

46' CATAMARAN

Dreaming bigger. Because sometimes more is actually more.

The hull design that changed catamarans forever, taken to a whole new level. The ultimate offshore fishing machine, with unprecedented size, range and amenities to carry everyone and everything anywhere, in any conditions. A 46' catamaran designed to efficiently achieve world-beating performance out of quad-outboard engines, while providing sportfish-level fishability and specifications. Like the Magnificent Frigate Bird, it will be king of all it surveys.
